## Fifty House Designs

---

**W**ITHOUT EXTRA COST to our readers we have added to this and each of Fred T. Hodgson's books published by us the perspective view and floor plans of fifty low and medium priced houses, none of which are duplicates, such as are being built by 90 per cent of the home builders of to-day. We have given the sizes of the houses, the cost of the plans and the estimated cost of the buildings based on favorable conditions and exclusive of plumbing and heating.

The extremely low prices at which we will sell these complete working plans and specifications make it possible for everyone to have a set to be used, not only as a guide when building, but also as a convenience in getting bids on the various kinds of work. They can be made the basis of contract between the contractor and the home builder. They will save mistakes which cost money, and they will prevent disputes which are never settled satisfactorily to both parties. They will save money for the contractor, because then it will not be necessary for the workman to lose time waiting for instructions. We are able to furnish these complete plans at these prices because we sell so many and they are now used in every known country of the world where frame houses are built.

The regular price of these plans, when ordered in the usual manner, is from \$50.00 to \$75.00 per set, while our charge is but \$5.00, at the same time furnishing them to you more complete and better bound.

# Remember

We can mail out the same day we receive the order any complete set of working plans and specifications we illustrate in this book.

## Remember also

That, if you are going to build, complete working plans and specifications always

## Save Money

for both the owner and contractor.

They prevent mistakes and disputes.

They save time and money.

They tell you what you will get and what you are to do.

# Estimated Cost

---

It is impossible for any one to estimate the cost of a building and have the figures hold good in all sections of the country.

We do not claim to be able to do it.

The estimated cost of the houses we illustrate is based on the most favorable conditions in all respects and does not include Plumbing and Heating.

Possibly these houses cannot be built by you at the prices we name because we have used minimum material and labor prices as our basis.

The home builder should consult the Lumber Dealer, the Hardware Dealer, and the Reliable Contractors of his town. Their knowledge of conditions in your particular locality makes them, and them only, capable of making you a correct estimate of the cost.
